DETAILED ACTION

This Office Action is in response to applicant's RCE application filed on 12/10/2004. Claims 1-36 are pending.

Allowable Subject Matter

Claims 1-36 are allowed. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a semiconductor circuit layout system and method of operation for populating parameters of design cells defining a physical layout of circuit element blocks in a hierarchical semiconductor structure. The system includes means: programming a plurality of design cells, each programmable design cell corresponding to a local file and having a set of parameters created by relating the corresponding local variables within a local file to global geometric variables from the global file, and an inherent file such that changes of global geometries variables in the global file may cause changes in the design cells for the physical layout of the hierarchical semiconductor structure in accordance with parameters and inherent feature in the local files.

Because the prior art of record does not expressly disclose or suggest the semiconductor circuit layout system with means for inherently relating physical cell layout parameters in the hierarchical structure of the semiconductor design to reflect change in geometrical size and shape of the physical cell layout as claimed, the claims are thus deemed allowable.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Thai Phan whose telephone number is 571-272-3783. The examiner can normally be reached on Monday-Friday.
